There is one crucial fact that experienced project managers have sometimes painfully learned: The project management approach used must support a project team's effort to meet the project's cost, time, and quality requirements. Despite this maxim, many project managers instead choose the approach they know best, as opposed to the approach that can best serve the project's needs.

Project management is the process of leading the work of a team to achieve goals and meet success criteria at a specified time. The primary challenge of project management is to achieve all of the project goals within the given constraints. This information is usually described in project documentation, created at the beginning of the development process.
