The pathophysiology depends on the specific cause of right axis deviation. Most causes can be attributed to one of four main mechanisms. [14] [15] These include right ventricular hypertrophy , reduced muscle mass of left ventricle, altered conduction pathways and change in the position of the heart in the chest.

There is a scarce number of specialists around, so sometimes you have to try to be their specialist. I also loved the patient population in the clinic/hospital that I was rotating in. They were all so incredibly sweet, willing to share their personal and medical stories, and allowed me to practice my clinic skills on them.

The liver parenchyma is the functional component of the liver, made up of the hepatocytes that filter blood to remove toxins. This contrasts with the stroma, the connective tissue that supports the liver and creates a framework for the hepatocytes to grow on. In patients with liver disorders, part of the liver parenchyma is damaged and does not function properly.

Pathophysiology. The pathophysiology of hydrocephalus occurs as follows: Normally, a delicate balance exists between the rate of formation and absorption of CSF. In hydrocephalus, this balance is disturbed. CSF is formed mainly in the lateral ventricles by the choroid plexus and is absorbed into the venous system through the arachnoid villi.

Cleft lip repair. Surgery. Cleft lip repair, usually performed by a plastic surgeon, is a major part of the treatment of a newborn with cleft lip, palate, or both; some surgeons favor early repair, before the newborn is discharged from the hospital; other surgeons prefer to wait until the newborn is 1 to 2 months old, weighs about 10 lbs, and is gaining weight steadily.

[Cleft Lip and Cleft Palate Nursing Care Management](#)

The maxillary sinus is incredibly close to the maxillary teeth. In fact, it can often be seen on a dental x-ray situated above the molar and pre-molar teeth in the upper jaw. Because of this, it allows for easy spread of infection. An odontogenic infection is an infection that originates within a tooth.
