Pain and pain pathways 1. PAIN AND PAIN PATHWAYS
Presented by: Dr. Dhvani Gohil
2. "I don't accept the maxim 'there's no gain without pain', physical or emotional. I believe it is possible to develop and grow with joy rather than grief. However, when the pain comes my way, I try to get the most growth out of it."

WILLIAM T. JOHNSON, JAMES C. KULILD, in Cohen's Pathways of the Pulp (Tenth Edition), 2011 Zinc Oxide and Eugenol. Zinc oxide-eugenol sealers have a history of successful use over an extended period of time. Zinc oxide-eugenol sealers will absorb if extruded into the periradicular tissues. 13 They exhibit a slow setting time, 6 shrinkage on setting, solubility, 158, 235 and they can stain ...

The study of human macrophages and their ontogeny is an important unresolved issue. Here, we use a humanized mouse model expressing human cytokines to dissect the development of lung macrophages from human hematopoiesis in vivo. Human CD34 + hematopoietic stem and progenitor cells (HSPCs) generated three macrophage populations, occupying separate anatomical niches in the lung.

Tissue-resident macrophages maintain healthy organ function, but the ontogeny of human macrophages is largely unknown. Using humanized mice and single-cell RNA sequencing, Evren et al. uncover the migration and differentiation of blood monocytes into distinct populations of human lung macrophages in vivo.

In recent years, stem cell therapy has become a very promising and advanced scientific research topic. The development of treatment methods has evoked great expectations. This paper is a review focused on the discovery of different stem cells and the potential therapies based on these cells. The genesis of stem cells is followed by laboratory steps of controlled stem cell culturing and derivation.
