[Paul E Tippens Physics 7th](#)

Gay's law (more correctly referred to as Amontons's law) states that the pressure of a given mass of gas varies directly with the absolute temperature of the gas, when the volume is kept constant. It is written as:  $P \propto T$ . It is a special case of the ideal gas law. Gay-Lussac is incorrectly recognized for the Pressure Law which established that the pressure of an enclosed gas ...
